# HOW QUALITY SIGNAGE BENEFITS YOUR BUSINESS

- By creating awareness of products, services and location.
- By attracting new customers and serving as a reminder for repeat business.
- By driving impulse traffic and sales.
- By being the most effective, yet least expensive form of advertising.
- By being effective 24 hours a day, 7 days a week.
- By developing a business's brand image, products and services.
- By driving sales, promotions, specials and other offers.
- By enhancing your location regardless of the setting.
- By helping your business function at its full economic potential.

*Minnesota Letters*

*Cast Bronze*

*Formed Plastic*

**Gemini products are only sold through Sign Professionals & Graphic Resellers listed under Signs in your Yellow Pages.**

Since 1964, Gemini has been committed to providing the finest letters and logos for the sign industry. Our experience has taught us that a well-designed sign is one of the most important investments a business will ever make. We don't take your investment lightly. That's why everything we make comes with a Lifetime Guarantee. Quite simply, if ever a Gemini product fails, we will replace that product no questions asked. Should there ever be a problem with an order, we will make it right by you.

As one of the world's leading manufacturers of letters and logos, we also know the importance of being an eco-friendly "green" manufacturer. That's why we only use the highest grade recyclable lead-free materials and renewable resource plastics for our products. In addition, we re-use all trim generated during manufacturing.

Your local sign company is your best resource for everything from creating the appropriate design for your business to installation and service of your dimensional lettering. Your local sign professional can help you select the best Gemini products for your business needs.

# MINNESOTA LETTERS™

Minnesota Letters combine the attributes of several other letter types. They are made from C.A.B. (Cellulose Acetate Butyrate), a renewable resource (non-petroleum) plastic for incredible durability. They also are created using precision tooled molds for razor sharp edges and extra dimension. While clearly a plastic letter, they are suitable for many “up-close” applications — even in small sizes. Gemini has a stock of these letters ready to paint to your specifications — so they will ship out generally within 1 business day.

## Incredible Precision & Options

- From 2" to 18"; each a perfect letter
- Serifs are always sharp, edges always crisp
- Mounts to any surface with most hardware
- Architectural style offers prismatic faces

## Better Alternative than Foam Letters

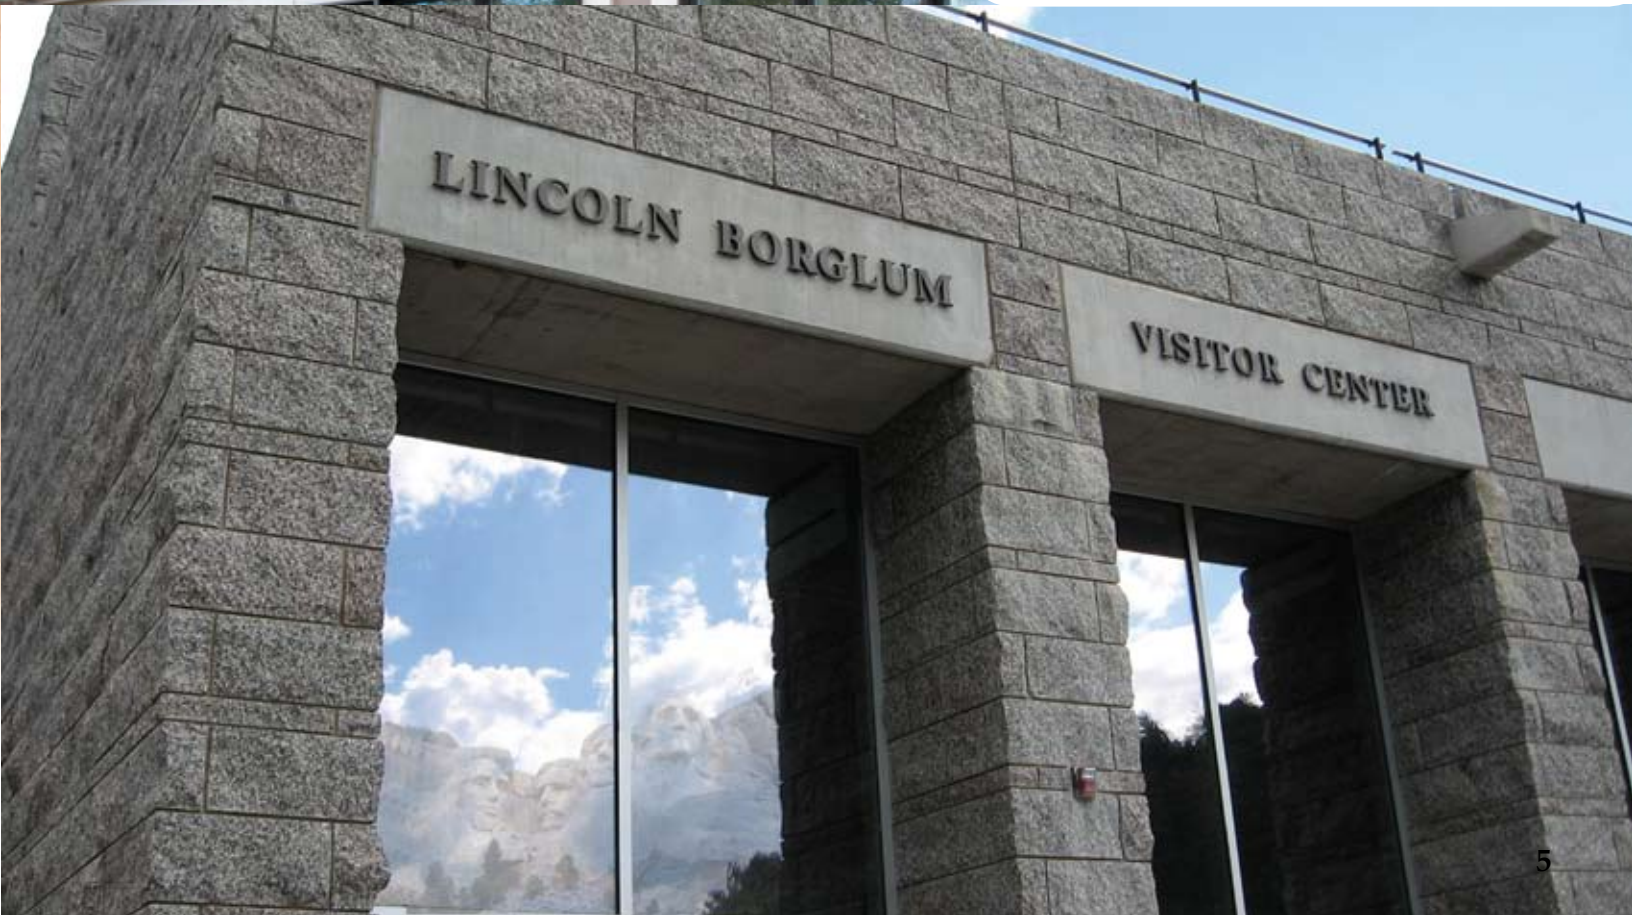

- Endures even the harshest conditions
- Blemish free automotive quality painted finish
- Quick production gives you instant results
- Made from a renewable resource (non-petroleum) plastic

## Where to Use Gemini Minnesota Letters

- When depth is required in letterstyle
- Virtually any business, organization or institution
- Under all weather and environmental conditions
- When sharp edges are required
- If sign surface requires pad mounts (i.e. glass)

## 45 Standard Minnesota Colors Custom painted colors available.

## Advantages of Minnesota Letters

### Quick Delivery

- 1 Day on White or Black
- 2 Days on Any Painted Color

### Durability

- Impact resistant
- Fade resistant
- Guaranteed for Life!

### Outstanding Appearance

- 45 standard colors
- Sharp clean lines & crisp returns
- Excellent for backlighting with L.E.D.
- Many excellent metallic finishes
- Same great look in small or large sizes

# FORMED PLASTIC

Formed plastic letters are the original “Gemini Letters”. Made since 1963 out of C.A.B. (Cellulose Acetate Butyrate); these letters are the utmost in versatility. Formed Letters, while the standard for most local businesses, can also be found on financial institutions, office parks, as well as many national retail chains. Their inexpensive molds make it easy to customize a letter style or logo for the perfect 3-D sign. Formed Letters also provide the deepest dimension for the money. With Gemini’s 4 different forming locations across the U.S. and Canada – most letters are just days away from your doorstep.

## Unlimited Variety & Flexibility

- Over 140 standard styles and 40 standard colors
- Easy customization for your style or logo
- Custom painting to match your specific color
- Simple installations for any mounting surface
- Choose from flat, round, prismatic or sculptured faces

## Economy & Durability

- Endures even the harshest conditions
- Best dimension for the money
- Quick delivery gives you instant results
- Made from a renewable resource (non-petroleum) plastic

### **Where to Use Gemini Formed Plastic Letters and Logos**

- When depth is required in letterstyle and/or logo
- Virtually any business, organization or institution
- When facing extreme time constraints
- Under all weather and environmental conditions
- When letter height up to 60" is required

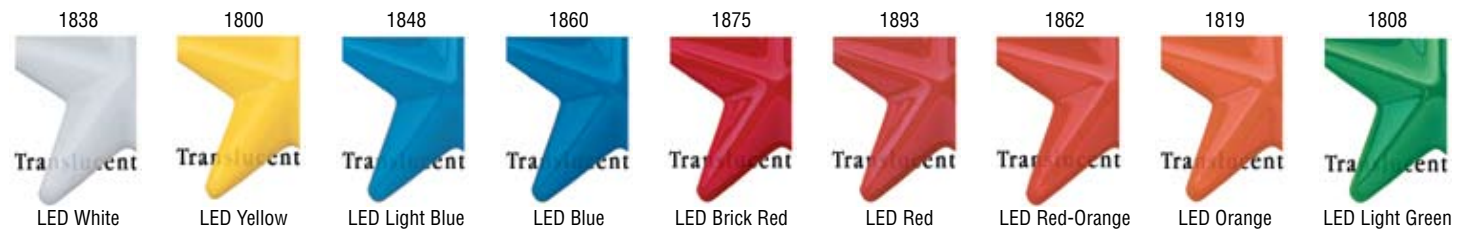

## 40 Standard Pigmented Colors Custom painted colors also available.

*\* Lemon Yellow & Light Blue are not recommended for use with studs or pads.*

## Translucent Colors Specifically Formulated for L.E.D. Illumination

- Built-In light diffusion
- Combine L.E.D. with deeper Custom Formed letters
- Great substitute for Channel Letters
- U.I. Recognized Component

# LASER CUT ACRYLIC

Gemini starts with its own impact modified, extruded acrylic, in gauges up to 1/2" thick in over 32 different colors. No where else can you find colors through and through the entire letter. This assures no more unsightly scratches, chips, or blemishes that can occur over time in painted finishes. Our 1000W lasers polish the edge returns of all letters and logos as it cuts through the material, providing a superior finish for your customer. Gemini's acrylic products are designed for outdoor use, but beautiful enough for any application where precision is required.

## You can't cut your own at these prices

- Gemini nests thousands of orders to assure minimal scrap and lowest cost of acrylic.
- Our 3 shift operations can produce your order in 2-3 days with all hardware and mounting patterns.
- Gemini re-extrudes trim not used to offer even lower prices to get your order.

## Design flexibility to the extreme

- From 1/2" to 72" letters.
- 32 standard colors or choose a custom finish.
- Pigmented gauges of 1/8", 3/16", 1/4", 3/8" and 1/2"
- Your artwork is converted to an exact 3-dimensional acrylic replica.
- Laminated metal on acrylic available on page 17.

### Where to Use Gemini Flat Cut Acrylic

- When an intricate letterstyle or logo is required
- On designs with multiple layers and colors
- When working with a limited budget
- Under tight time constraints
- Indoor signage that falls under the closest scrutiny

# 32 Standard Pigmented Colors Custom painted colors also available.

## Custom Painted Acrylic

Gemini can combine precision-cut acrylic logos with superior positive pressure paint booth capabilities to produce some of the finest detailed signage in the industry.

# METAL LAMINATE ON ACRYLIC

Gemini Metal Laminate Acrylic Letters are just the ticket when the look and feel of metal is needed but a budget doesn't allow for it. Featuring an upscale look at a fraction of the cost, Gemini laminated acrylic letters and logos are ideal for developing an elegant and professional look for corporate lobbies, government offices and other organizations. Designed for indoor applications, these exquisite letters can also be used in certain outdoor applications thanks to Gemini's "edge seal" process that greatly reduces deterioration and de-lamination caused by exposure to nature and the elements. With seven metal laminates and our full range of 32 acrylic colors available, you have more standard options to choose from than you will find anywhere else.

## Made from the Highest Quality Material

- Made from materials that are lead and mercury free – No PVC (Poly Vinyl Chloride) plastic.
- Gemini recycles and extrudes all scrap material.
- Excellent edge quality.

## The Look of Metal Without the Cost

- Laminate is REAL metal – a .025" layer of metal is affixed to each letter.
- Letters are solid acrylic through and through – no flimsy foam or hazardous PVC materials used.
- Designed for interior but sturdy enough for outdoors.
- Lightweight and easy to install.

# Advantages of Metal Laminate Letters

*Recommended for indoor use.*

## Indoor Letters that Are Tough Enough for Outside

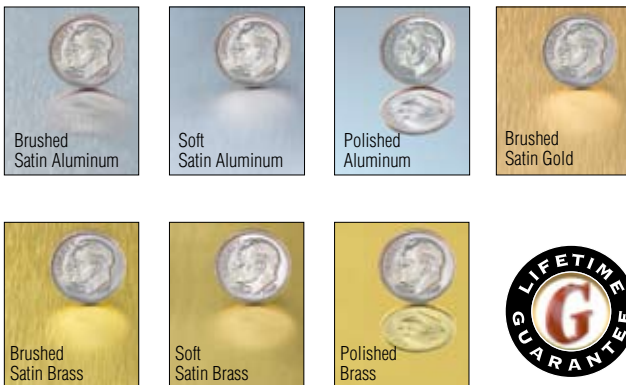

- Unlike other metal-laminate letters made of foam and PVC, Gemini Metal Laminate Acrylic Letters are made of components that do not deteriorate from exposure to the elements, get chewed up by the unwanted attention of birds or squirrels, and hold up better to contact with pedestrian traffic.
- No unsightly denting due to Gemini's backing material being made of impact modified acrylic.
- Edge returns look good at any distance due to the clean unporous acrylic used by Gemini.
- Letters look good up close and are visually striking from a distance.
- Delamination is greatly reduced by the use of acrylic as a substrate, and through Gemini's exclusive edge seal process.

## Many Options To Choose From

- Easy installation—durable lightweight letters can be mounted with studs, pads or double-face tape.
- Standard metal laminates include Brushed Brass, Soft Satin Brass, Polished Brass, Brushed Aluminum, Soft Satin Aluminum, Polished Aluminum and Satin Brushed Gold.
- By extruding our own acrylic, we can offer much more variety than you will find anywhere else. We have 32 standard pigmented colors available (page 14) in standard thicknesses ranging from 1/8" to 1/2".
- Can be made to your custom fonts & designs.
- Letters that are at least 3/8" thick can be drilled and tapped for stud mounting. Thinner letters with hardware will have a pad/block glued to the back.

## Standard Metal Laminated Finishes

## Metal Laminate Letters Are Perfect For

- Intricately detailed indoor applications where your letters & logos must be cut to your precise specifications. Standards sizes range from 3" all the way up to 48"
- Where dimensional look of metal is needed in a cost-effective manner
- Signage that needs to convey a professional appearance

# CAST METAL

Cast letters and logos have always imparted a stately aura of permanence, style, and class on the sites they adorn. Perhaps this is because the underlying casting process itself has changed so little for thousands of years. It may also be because the casting process allows for the creation of the deepest, sturdiest, most beautiful metal letters and logos. No matter the reason, Gemini is the only one to use for cast signage. Gemini has devoted 50,000 square feet to the storage of our CNC cut, hand-finished patterns in over 50 of the most common letterstyles. Our all-electric, pollution-free furnaces in Texas, Iowa, and Minnesota melt the virgin bronze and aluminum ingot used in the process. Our hand-finished product is produced for you in about 8 days – often for less than what you would expect to pay for such quality.

## Durability & Long Lasting Beauty

- Natural satin is standard but not the only option
- Lifetime guarantee on all finishes
- Mounting hardware included in all orders with appropriate stud diameter for quality installation
- All materials cast are lead and mercury free

## Cast = Quality + Affordability

- Over 50 standard styles and more economical than sheet cut aluminum or bronze products.
- The depth in cast letters is unmatched
- Custom logos are available at minimal expense—especially with repeat orders or duplicate pieces
- Our hand finished letters come in 16 different finishes including polished, anodized, or oxidized

*Photo courtesy of:  
Countryside Signs, Seekonk, MA*

### **Where to Use Gemini Cast**

- When depth is required in letterstyle and/or logo
- On professional offices, universities and government buildings
- When flat cut-out is too expensive
- When needing a sense of permanency

**FINISH NOTES:** All Patinas, by their very nature, will vary from letter to letter and order to order. These finishes will change in appearance over time depending on contact with moisture and temperature. Patinas can “bleed” onto the installation surface when installed outside. The only exception is the Nouveau Patina, which is a powder-coated, simulated Patina finish on an aluminum letter.

## 45 Standard Gemini Baked Enamel Colors Any custom color also available.

Due to limitations in the printing process, printed colors can vary from actual colors. NOTE: Speciality paints, such as car colors, can be specified.

# FABRICATED METAL

When your customers use words like “Upscale,” “Elegant,” and “High End,” to describe the type of letters they are looking for, you can be confident that Gemini Incorporated is your source for providing the striking letters of distinction they demand. That’s because Gemini produces very prestigious letters for your most discerning customers.

Gemini’s Stainless Steel Fabricated Letters are premium letters that have been expertly crafted to meet the exacting requirements of your most sophisticated clientele. With lead-free silver solder and crisp 90° angle edges, Gemini Fabricated Letters offer the technical specifications required of such letters with the utmost in beauty and production standards you’ve come to expect from us.

## Hand Crafted Stainless Beauty

- Virtually unlimited design potential
- Perfect for LED and neon
- Stainless Steel is much more durable than aluminum
- Quick turnaround; most orders shipped in just 10 working days
- Guaranteed For Life

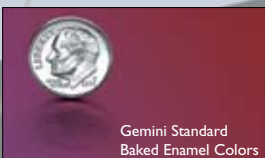

### Where to Use Gemini Fabricated

- When depth is required in letterstyle and/or logo
- When a high-end look is desired
- When mirror face and returns are needed
- When needing a sense of permanency
- When backlighting is necessary

### Finish Options

# WATERJET METAL

Waterjet cut letters offer the combination of the precision available in a CNC controlled 70,000 psi cutting head and the durability and distinction of pure metal. Gemini's 5 locations across the U.S. and Canada can take your .EPS, .CDR, or other vector-based art file and use it to carve out a design from cold rolled sheets of aluminum, brass, bronze, copper, or even stainless steel. Once cut, your order is less than half-way through the process—your order will be hand-finished to your specification: whether polished, anodized, or even powder coated. Gemini waterjet cut letters are all durable enough for outdoors, yet perfect enough for any boardroom application.

## Incredible Precision & Options

- From 1/2" to 60" (or larger) letters & logos
- 8 metals, 6 gauges and 41 finishes are standard
- Sharp .02" inside radii on all corners
- Custom painting available—one or more colors

## Durability and Beauty

- Endures even the harshest conditions
- Blemish free quality polyurethane paints or high performance powder clear coat on aluminum letters
- Made in less than 8 days
- All scrap is recovered for use in casting operations

### Where to Use Gemini Waterjet Cut Metal

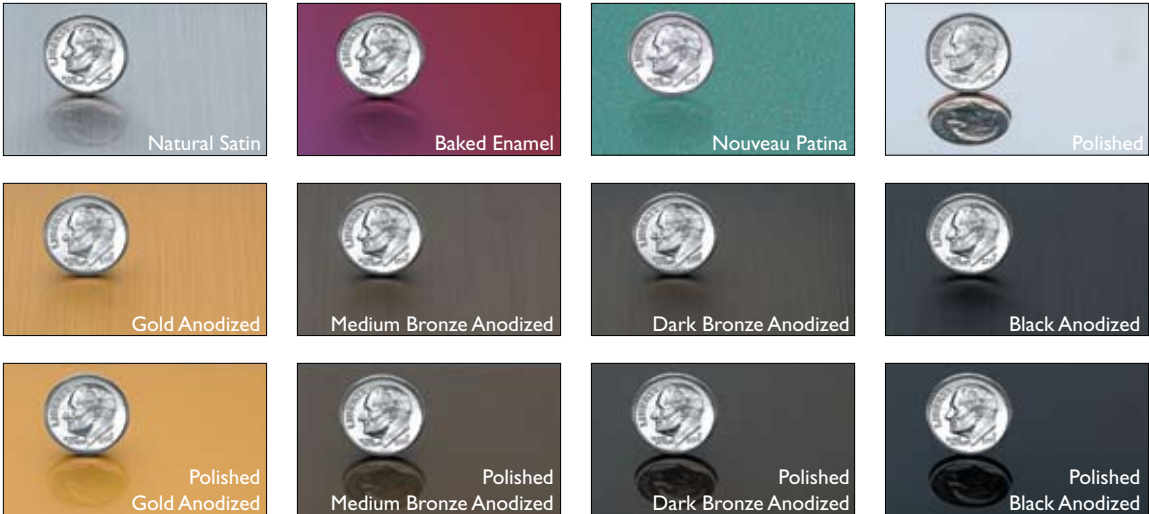

- When an intricate metal letterstyle or logo is required
- Virtually any business, organization or institution
- When brass, copper or steel is needed
- Under all weather and environmental conditions
- Indoor signage that falls under the closest scrutiny

## Not Just Natural Satin

Gemini can combine precision waterjet cutting with our superior positive pressure paint booth capabilities to produce some of the finest detail in the industry.

# GEMINI METAL LETTERS

For applications where small letters are a necessity, yet the utmost quality and precision is needed in metal letters – select Gemini Minis. Made from the same material and finished to the same quality standards as other Gemini metal letters, Gemini minis are the option for your circumstances where use of extremely small letters are a necessity. When style and image matter, proudly display GeMINI Metal Letters in your reception area, lobby, and/or conference room.

## Incredible Precision & Options

- From ½" to 1 ¾"; each a perfect letter
- Serifs are always sharp, edges always crisp
- Available in Aluminum, Brass & Bronze Alloys
- Available Polished, Anodized, Oxidized & Painted Finishes

## Ideal for High End Indoor Signage

- Will not dent or chip like some metal laminates
- Blemish free automotive quality painted finish
- Seamless mix with other Gemini metal letters
- Many different letter styles to choose from

# Advantages of GEMINI Letters

## GeMINI Metal Letters Are Perfect For:

- Law Offices
- Title Companies
- Insurance and Investment Firms
- Libraries and Public Buildings
- High-End Salons and Spas
- Mortgage and Banking Institutions
- Government Buildings and Offices
- Property Management and Corporate Headquarters
- Hotel Signage

## Unique Upscale Look:

GeMINI Metal Letters provide a source for very precise and exacting letters required by extremely small applications. Thanks to our patent-pending manufacturing process, each and every letter is crisp and clean, providing a high-tech source for mini metal letters that have the polished brass look of gold or the silvery glow of satin aluminum.

## GeMINI Metal Letters Are:

- **Precise.** Exacting mini metal letters specifically designed for high-end indoor use.
- **Consistent.** Letters are perfect every time.
- **Durable.** Crafted for indoor needs, yet sturdy enough for exterior signs.
- **Have Variety.** Made of the finest grade bronze, brass and aluminum and finished to the same high quality standards as other Gemini metal letters.
- **Guaranteed for Life.** Like all of our products, these letters come with a Lifetime Guarantee.

## Limitations on Mini Finishes

In order to obtain the tight precision required on letters of this size, we limit our manufacturing to 1/8" and 3/16" thicknesses only. Due to the small size and thin strokes of these letters, anodized and patina finishes are only available where we can drill & tap the letters.

## Prismatic MINI Letters Are Now Available

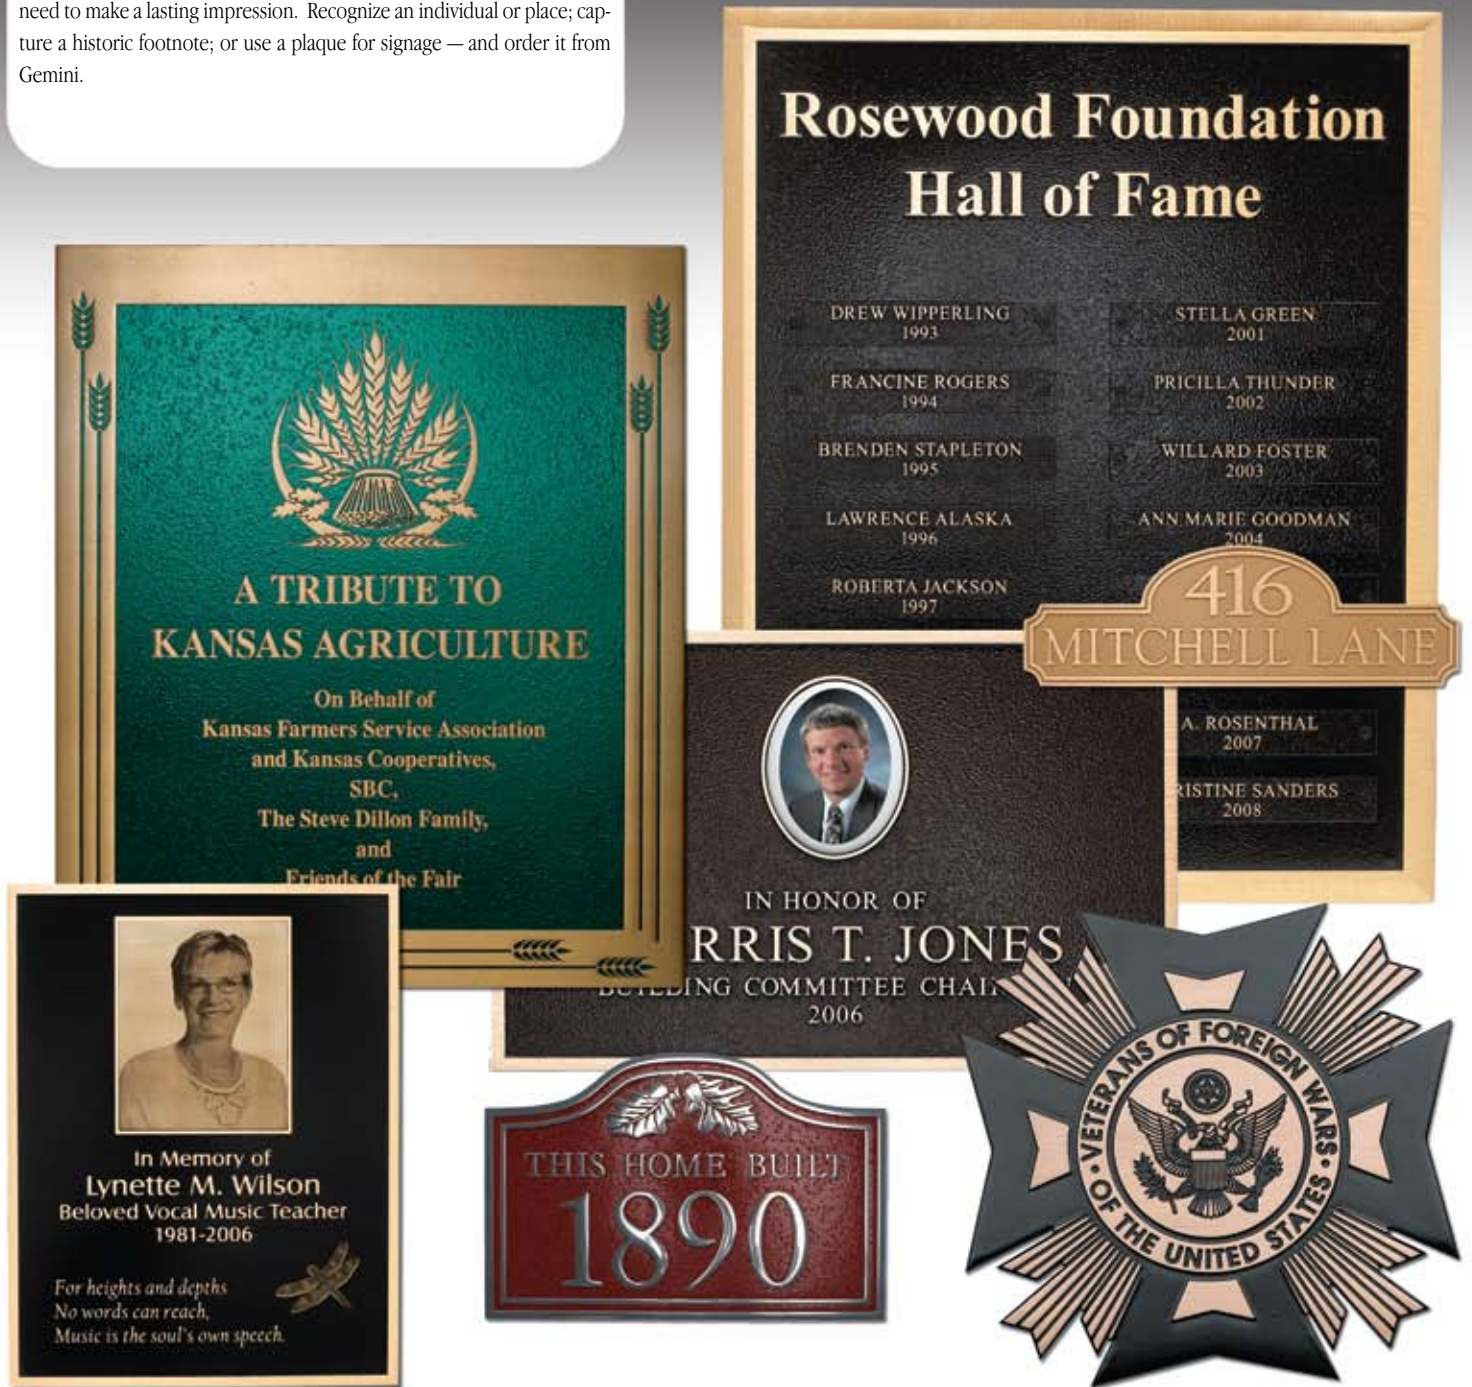

*Actual Size Shown*

# PLAQUES

Whether your plaques are Cast Architectural, Etched, or those requiring ADA specifications — Gemini can create the marker, seal or plaque you need in just 8 working days. Gemini uses a variety of methods to manufacture our plaques — all using virgin materials of the purest alloys. Whether lead and mercury free bronze, high-grade aluminum, lead-free brass or #304 or even #316 stainless steel—Gemini has the metal you need to make a lasting impression. Recognize an individual or place; capture a historic footnote; or use a plaque for signage — and order it from Gemini.

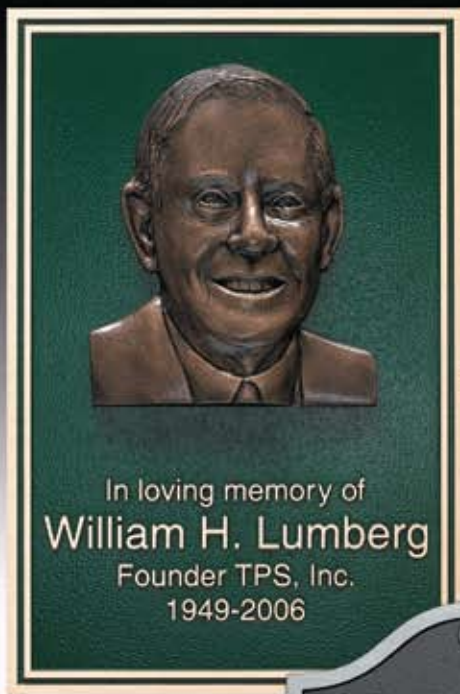

## No extra charges or hidden fees

- 8-day production (after art approval) is standard — no rush charges
- Choose any custom shape — same price
- The first 1200 letters are free
- Standard hardware and rosettes included

## Incredible variety and level of detail

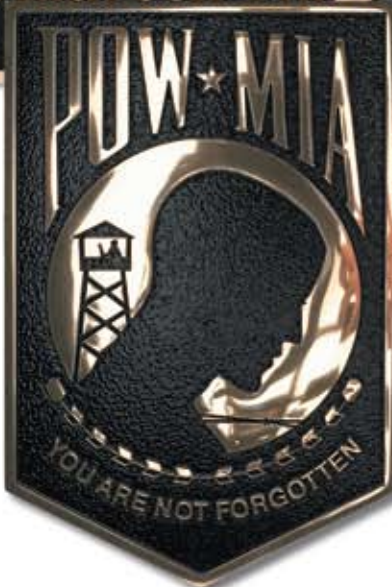

- Cast, Architectural, Etched & ADA available
- Bas reliefs, custom logos, & choice of mounting
- Government seals, rosettes, and virtually any typestyle
- Custom borders, edge detail, & surface finishes

## Where to Use Gemini Plaques

- Universities, public buildings, golf courses & casinos
- Monument signs & entrances
- Dedications, awards & recognitions
- For upscale wayfinding and ADA applications
- Boardroom or lobby signage for maximum impression

# ETCHED PLAQUES

Gemini's etched plaques are made from virgin sheet stock that is always lead & mercury free. The chemical etching process allows us to reproduce even the most complex artwork onto the surface of the metal. Used in combination with Gemini's cast and architectural plaque lines – etched medallions and emblems provide the precision needed to accentuate the perfect plaque or marker. Gemini can etch Brass, Bronze, Copper and Stainless Steel in varying gauges and dimensions – and like Gemini's architectural plaques, 8 day production is standard on etched plaque orders.

# ADA Metal Plaques

Gemini ADA directional signage offers beauty, style and compliance. Available in the standard 6" x 8" x .25" with a stipple or sand background, or in your own custom design.

Don't let ADA signage requirements be an eyesore – order solid aluminum, bronze & brass ADA compliant plaques from Gemini. Unlike other ADA compliant products – Gemini's patent pending process does not use loose beads for the braille component; or rely on imperfect, non-compliant castings. Like our plaques – they are perfect every time.

## Custom ADA Plaques

In addition, Gemini can provide customization in both color & design to allow you to make your ADA signage work with your location, not stick out from it.

# FORMED PLASTIC CHANNEL LETTERS

Unlimited customization combined with rapid response shipping make Gemini's Formed Channel Letters a revolutionary new product in the fast-growing area of illuminated channel letters. Using standard letters styles or your custom artwork and fonts, our thermoforming process creates beautiful, professional-looking channel letters that are ideal for any business seeking a unique eye-catching look. These ground breaking letters and logos offer lower mold costs, shorter lead times, design flexibility and large part capabilities. Standard colors and typestyles can be shipped in only 5 days. Custom orders precisely designed to suit your needs can be shipped in just 8 days. If the only limit to imagination is the means to produce it, then let your imagination run wild with Gemini's Formed Channel Letters.

## Advantages of Formed Plastic Channel Letters

### Precision Engineered and Specially Designed

- Gemini extrudes its own sheets of CAB plastic. These sheets are then thermoformed by heating and vacuum forming them around precision molds for perfect-every-time channel letters.
- Pigmented CAB colors used for channel letters are all translucent and specially formulated for LED illumination.
- Precise custom formed Channel Letters from Gemini offer a cost-effective alternative to expensive metal channels that must be assembled by hand, one at a time.

### Great-Looking Letters – Day or Night

- Unlimited customization means these raised letters look great – day or night. Channel Cans are available in any color.
- Gemini's ability to help you create unique one-of-a-kind designs help establish branding for corporate projects as well as neighborhood businesses.
- Precision-made molds and vacuum forming process gives channel logos a unique and custom look.
- Gemini's flexibility and reliable performance can solve your lighting challenges.
- Light weight and easy to handle and install; ideally suited for temporary displays.

**NOTE: Not for use with high heat and/or high voltage lighting systems.**

# PRONTO™ CHANGEABLE COPY

Clear acrylic blanks are precision injection molded to a .080" thickness. These blanks will not warp or blow away under most conditions. Raised edges prevent scratching. Feet on the base of each letter keep it from being frozen to the track in winter. These premium blanks are silk screened with ecologically sound UV inks. This design has received U.S. Patent D 354313.

## MoonGlo® Letters

Transparent letter with silk screened black background. Letters are made with a Beveled Overlay System. These letters are priced the same as other Pronto letters.
